Why Clario?

50+

indications

75%

of all oncology FDA approvals since 2012 were Clario supported

~5,000

total oncology trials

First-time precision in medical imaging when it matters most

At Clario, our focus extends beyond risk reduction. As your strategic partner, we leverage our experience with solid tumor trials and extensive portfolio of modalities to **provide the vital imaging data that determines the tangible impact of your trial.**

Our advanced reader platform and fit-for-purpose solutions, enriched by **50+ years of collective experience and insights from nearly 5,000 oncology trials** – **outpaces every other vendor in this space.** We're not just accelerating processes; we're anchoring them in precision via accurate endpoint selection and read criteria. The result? Rigorous, insightful data necessary to demonstrate your treatment's effectiveness.
